

DRYiCE™ iControl

Enterprise Control Center driven by
business flow observability

Product brochure

What problems does DRYiCE iControl solve?

Stability and Growth

I need visibility of my overall organizational health

I can't identify what is impacting the stability of my business operations

Regulatory Compliance and Risk Management

I need to show audit and regulatory controls on my business processes

Daily reports and transactions are often published after the respective cut-off breach, resulting in penalties

Efficient Operations

I need to review my business process and improve it

I can't identify recurring issues and near misses to implement service improvements

Client Perception

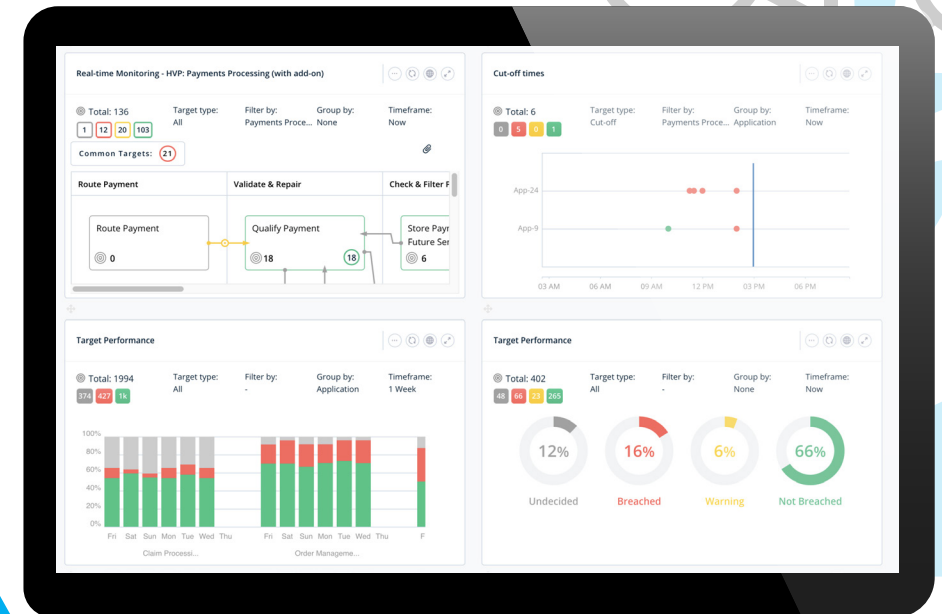

I need to be aware of client impacting problems, before they do

Value of DRYiCE™ iControl

It's the digital age and many enterprises now rely on technology and automation to drive their complex business operations. Often it is hard to know when, where, and why they go wrong. To be effective you need to have a real-time holistic view of your operations coupled with efficient identification and resolution of critical issues.

DRYiCE iControl, enabling the Enterprise Control Center, delivers real-time business flow observability, offering insight to leaders from CXOs down to the level of on-ground operations teams into business-relevant controls by creating meaningful views from both business and technology perspectives. It enables operations and technology staff to ensure seamless functioning of systems that powers the critical business flows on a 24x7 basis, while empowering them to respond proactively and effectively to any issues, alerts, or failures. It is a next-generation business flow intelligence solution driven by observability, accelerating innovation, and built to enhance customer experience.

iControl methodology

**Establish business
core team**

**Identify and select key processes
to be observed in real time**

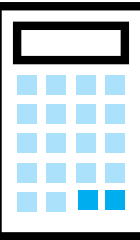

Operations
Risk & Compliance
Growth
