

Understanding the Transportation and Logistics industry

Transportation and Logistics industry is undergoing a massive evolution. Escalating customer expectations, fierce competition, and demand of lowering costs are among the factors driving this sector to reinvent business models.

Transportation and Logistics companies are adopting the disruptive technologies (AI/ML, Blockchain, Control Tower, etc.) to get the real-time insights enabling the organizations to improve the operational efficiency, enhance the visibility, and sustain in this dynamic market.

Backed by the diverse technology stack, Transportation and Logistics business processes often span across multiple business functions that complicates tracking, avoidance of non-compliance, on-time deliveries, and refining the business processes to plug any revenue leaks. Thus, enterprises require a holistic view of critical data and business processes across organizational boundaries to minimize operational costs, maximize revenue, pre-emptively identify, and mitigate potential risks, and improve the time-to-market.

Value of DRYiCE™ iControl for Transportation and Logistics

DRYiCE iControl (iControl) is a business flow observability solution for Transportation and Logistics industry that provides real-time and actionable visualization of the full set of business processes, their integration, and associated systems, providing business and technology operations a granular view into process capability against key performance indicators and defined service level agreements. It regulates the health of business processes with IT data, predicts and analyzes the business impact of any modifications made to the process, and identifies potential process optimization areas.

iControl enables the stakeholders to improve the decision-making process of various business functions like Route Planning, Vehicle Planning, Freight Planning, Rescheduling, Pickup Management, and many more. With iControl, organizations can go beyond the traditional monitoring of business processes and leverage next-gen observability to provide actionable insights to predict, prevent, and correct potential issues and performance bottlenecks.

iControl is embedded with industry process intelligence and is backed by HCL's experience in delivering business process services to Transportation and Logistics enterprises. We have funnelled decades of industry expertise gained while managing some of the industry's largest IT infrastructures into creating a product that provides an end-to-end view with comprehensive insights for forecasting and resolving possible risks.

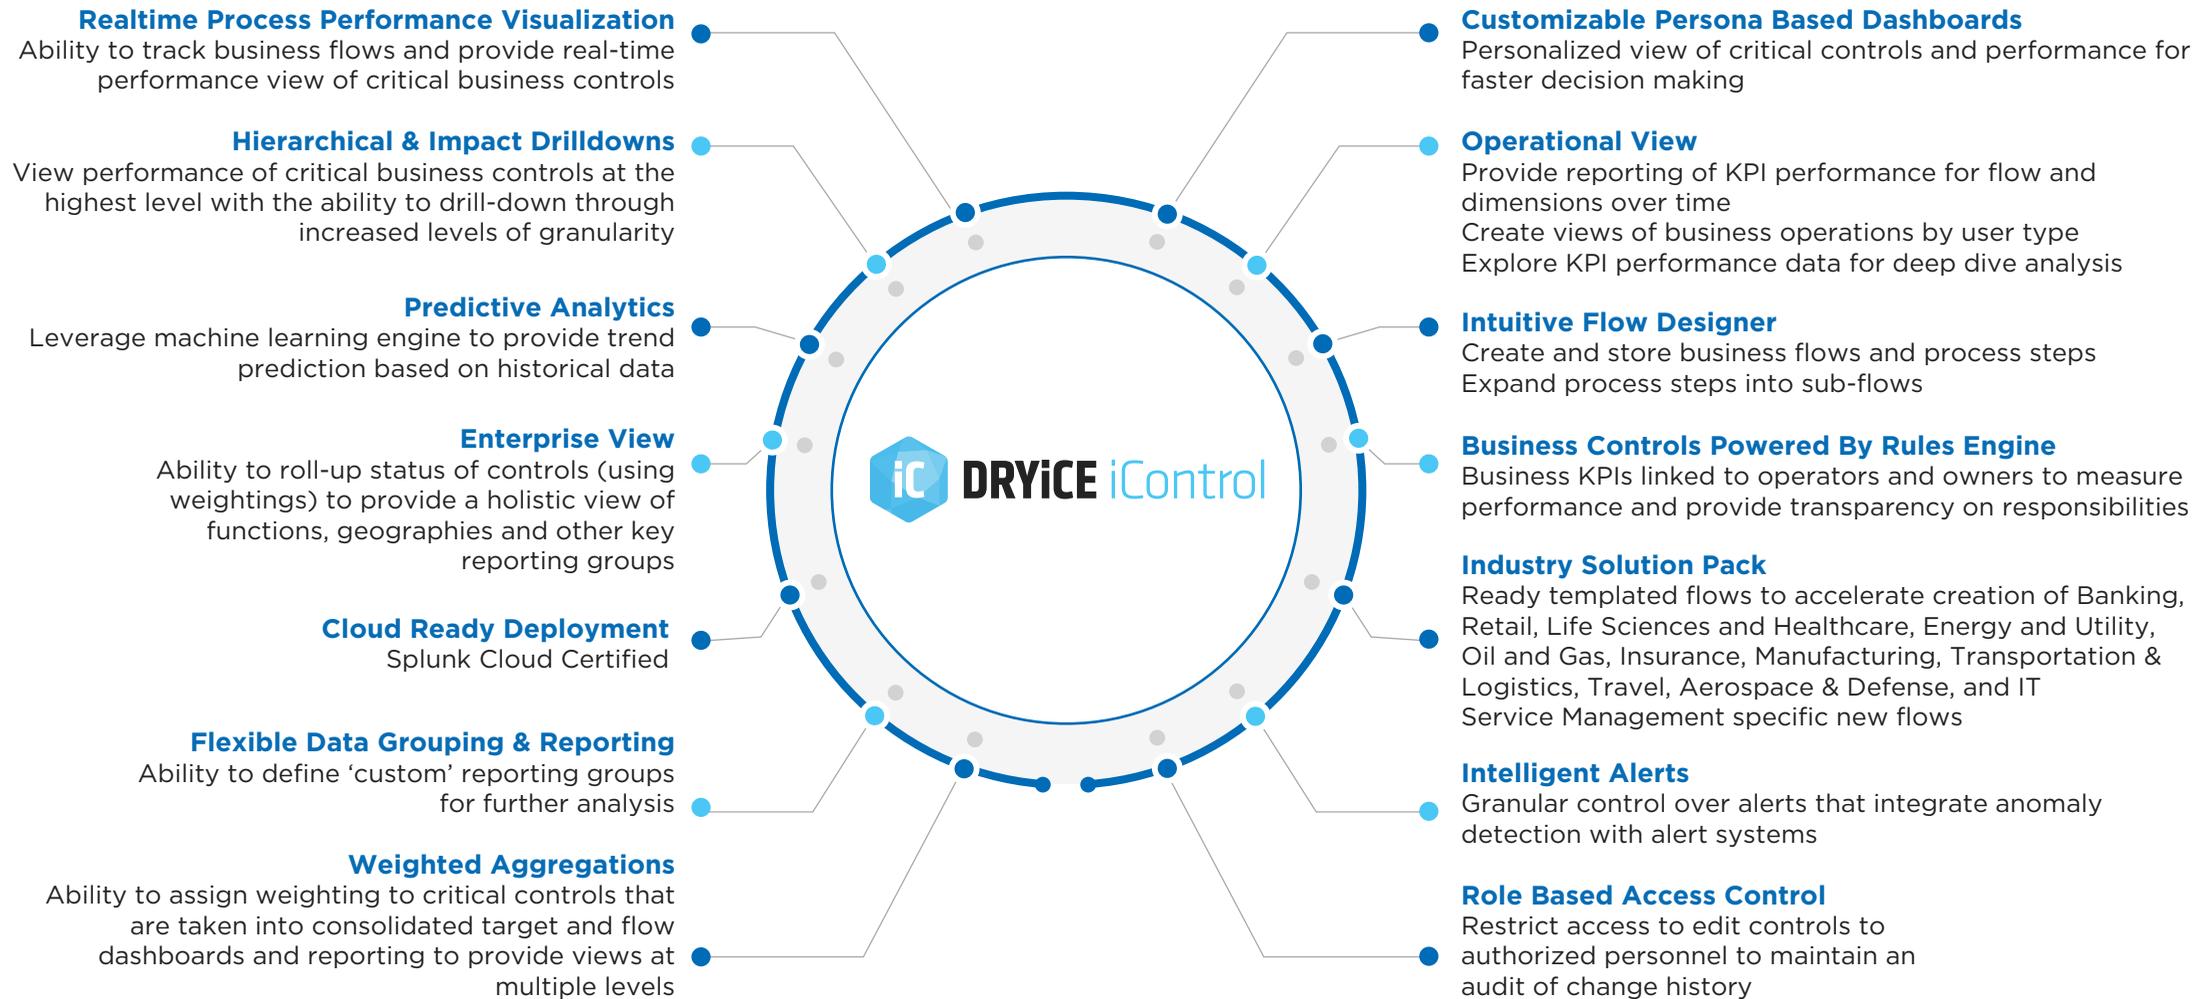

Key industry challenges addressed

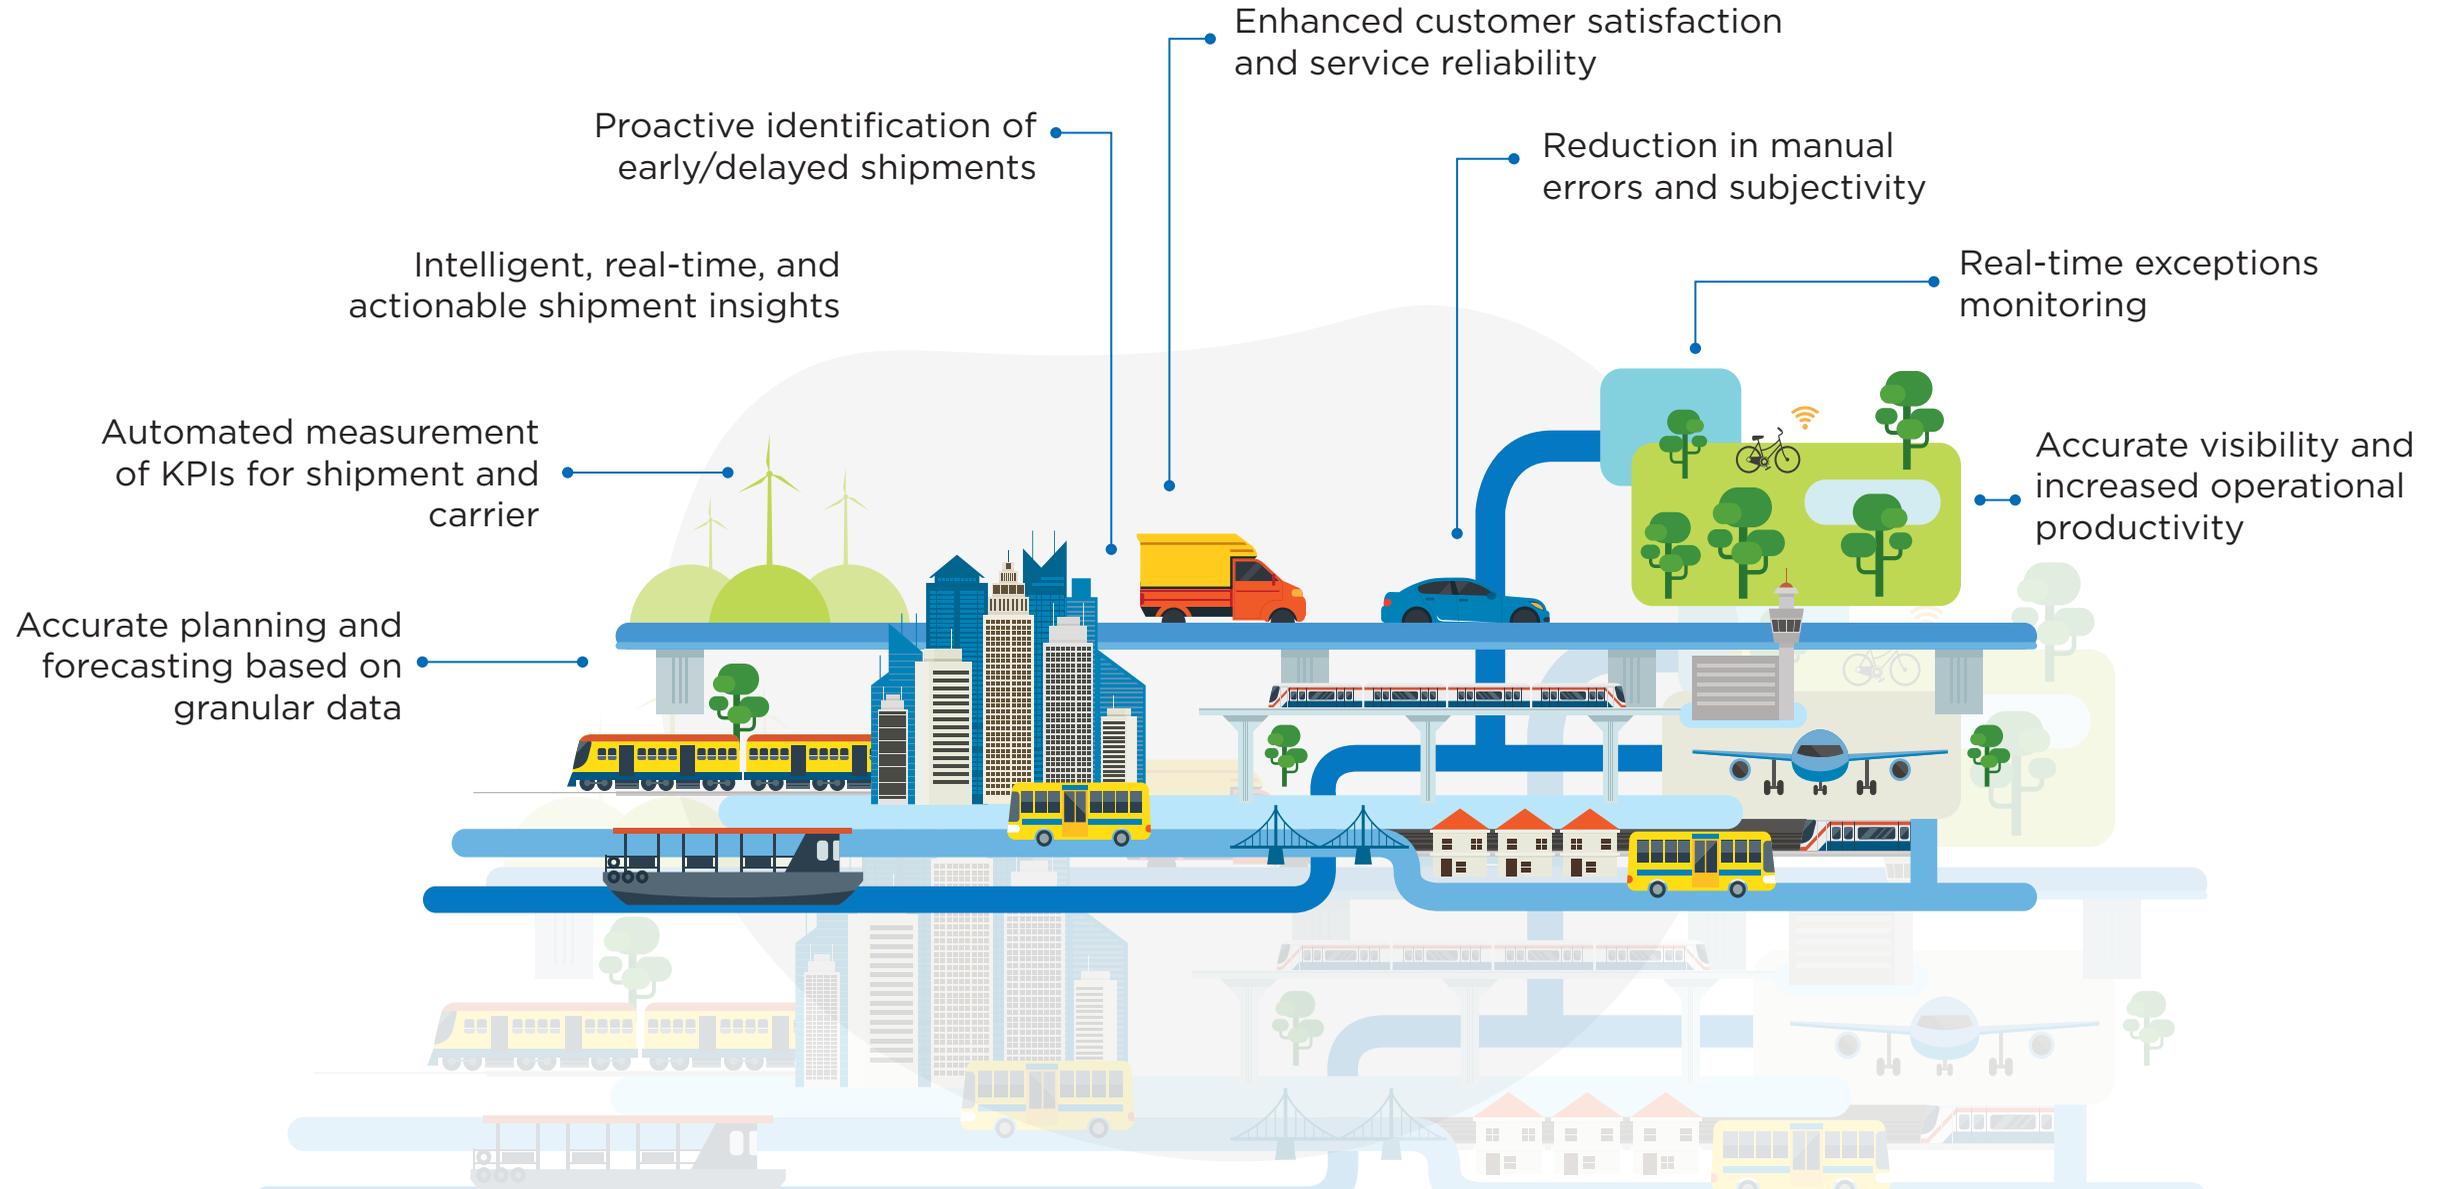

-  Limited end-to-end real-time shipment visibility
-  Inaccurate operational metrics
-  High or low inventory in the warehouse
-  Limited insight into actual shipment costs and savings opportunities
-  Sub-optimal transportation planning leading to poor use of shipment capacity
-  Stations work in silos, no unified or defined process
-  Slow recovery from operational disruptions, leading to missed SLAs, customer dissatisfaction and higher costs
-  Adherence to complex transport regulatory compliances

Key features

Key benefits

Industry use cases

Transportation/logistics cost reduction

Operational cost reduction iControl observes

Timely equipment driver availability and assignments

Idle time of transportation resources (i.e., dwell times)

Trailer capacity utilization

Faster shipment order processing, and transportation planning

E2E supply chain visibility

E2E supply chain visibility iControl displays

Network bottleneck detection and derive alternative path

Full cycle shipment tracking (order initiation through financial settlement)

Analyze broader network impacts and root analysis

Financial reconciliation

Accurate and timely financial reconciliation iControl learns

Procure-to-pay cycle breaches (i.e. variance between shipment invoice and quote)

Timely claims processing

Timely financial settlement (posting to GL)

Profitable analysis at shipment, carrier & customer level

Improved customer service

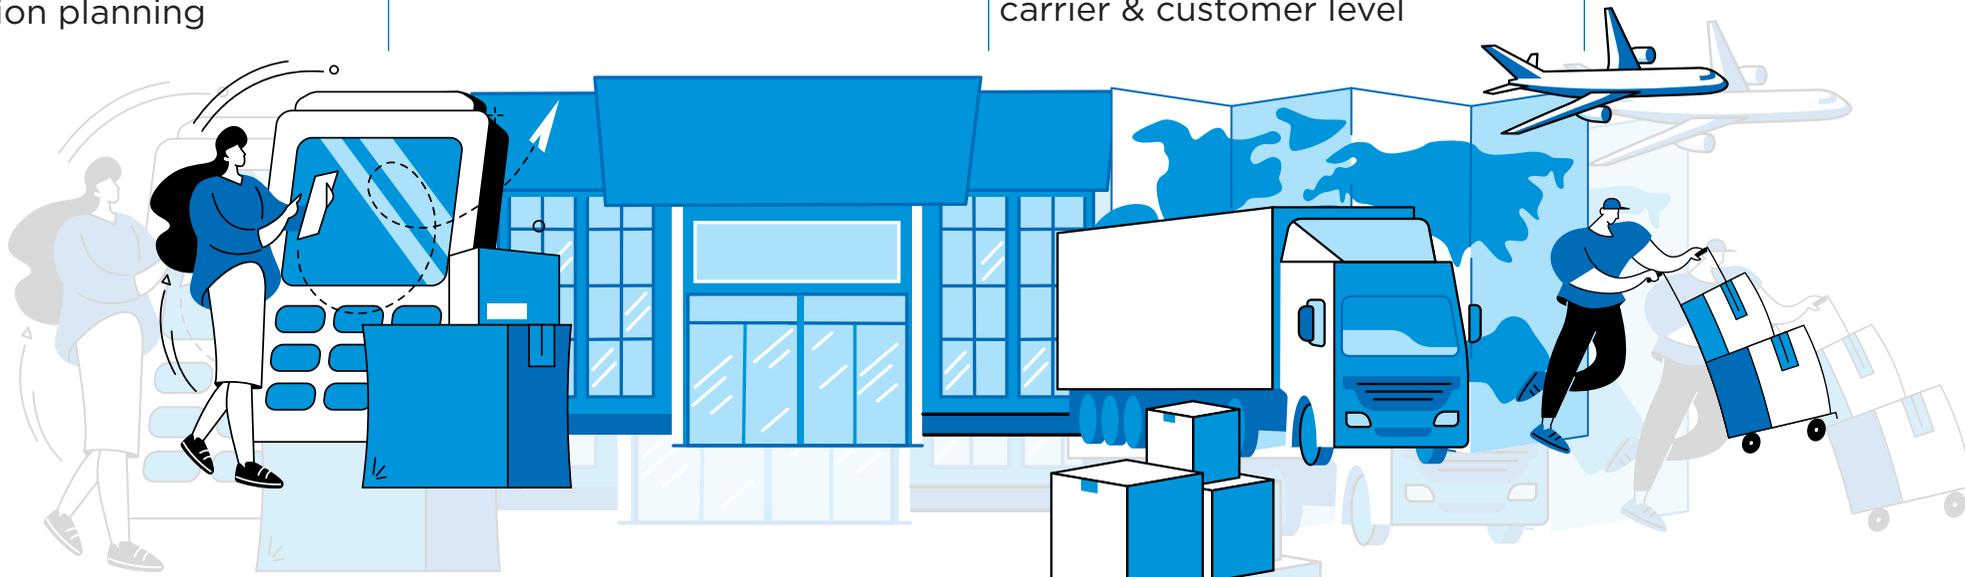

Customer service assurance iControl presents

Customer ETA variance alerts

Shipment performance history

Timely customer receipt and acknowledgement

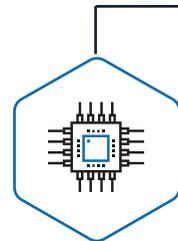

Customer level real-time tracking and reporting

About DRYiCE software

DRYiCE Software is a division of HCL Technologies focused on building industry-leading software products for transforming and simplifying IT and business operations by leveraging AI and Cloud.

Our vision focuses on:

Enabling a Service Oriented Enterprise

AI-Led Service Assurance

Driving Enterprise-Wide Digital Agility

Business Flow Intelligence
