

## Unified reporting and predictive analytics software

**HCL DRYiCE**  
MyXalytics

### Value of DRYiCE MyXalytics

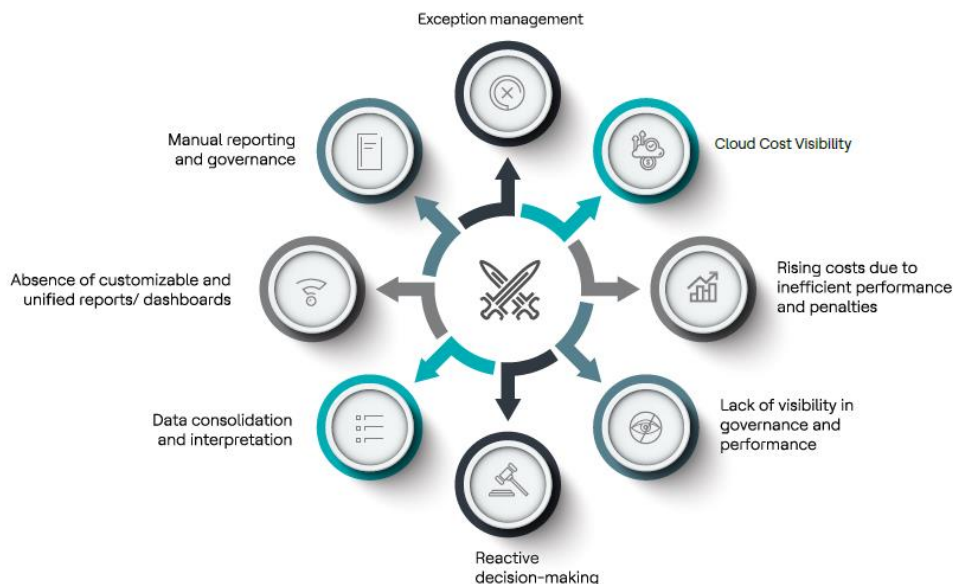

The volume of enterprise data is ever increasing. However, this data is fragmented and spread across multiple systems and tools, making it hard to gain actionable insights. To create end-to-end insights stakeholders, have to navigate multiple applications, manually export data, and rely on crude solutions to process the data. Enterprises require an intuitive way to derive insights that are relevant to their role and empower them to make informed decisions quickly.

**DRYiCE MyXalytics** is a unified reporting and dashboarding software that enables enterprises with unparalleled visibility into the performance of IT systems and processes. It provides decision-makers with the clarity they need to drive continuous operational improvements, optimize cost, and ensure the enterprise functions in a low or no risk environment.

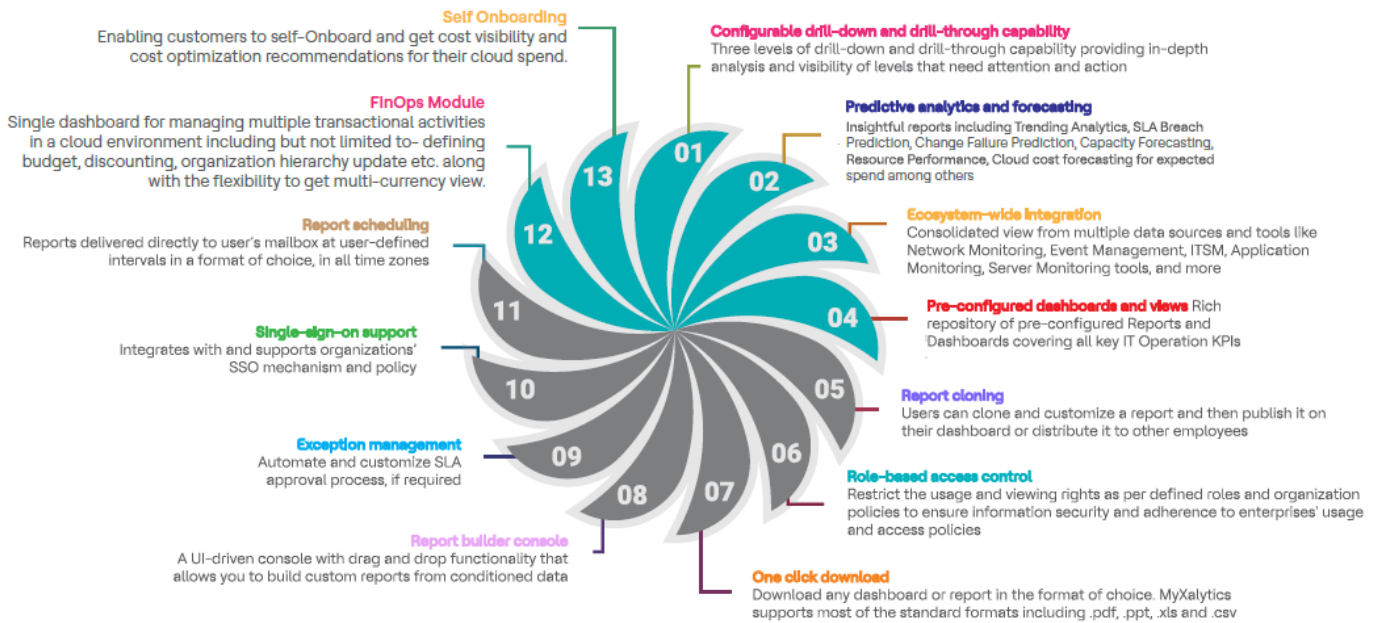

DRYiCE MyXalytics correlates, fuses, and analyses data from multiple enterprise tools to generate granular reports, and projects the results, tailored and configurable in role-based dashboards. It provides a unified view and instant, deep visibility of the entire IT operations environment. Its predictive analytics capabilities help organizations avoid business-critical incidents and disruptions.

Stay on top of your cloud spending with MyXalytics FINOPS module and get the flexibility to define and design custom reports leveraging the GUI based data analyzer and report builder. It helps you to effectively visualize, manage, and optimize your multi-cloud spends.

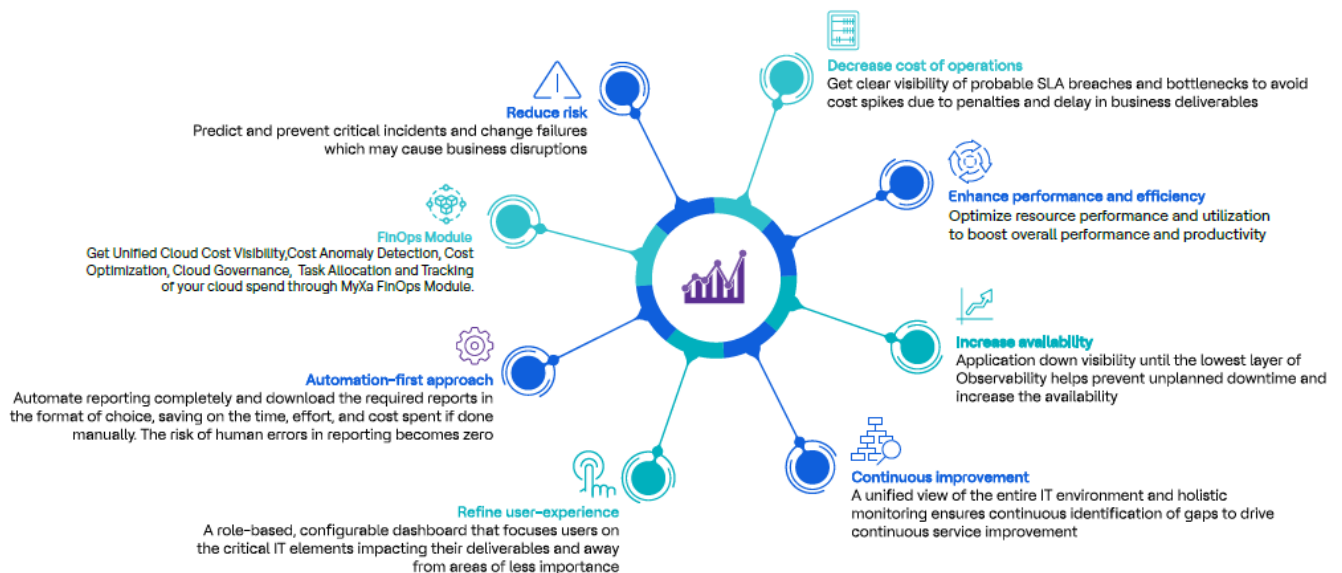

### Challenges addressed by DRYiCE MyXalytics

# Key Features

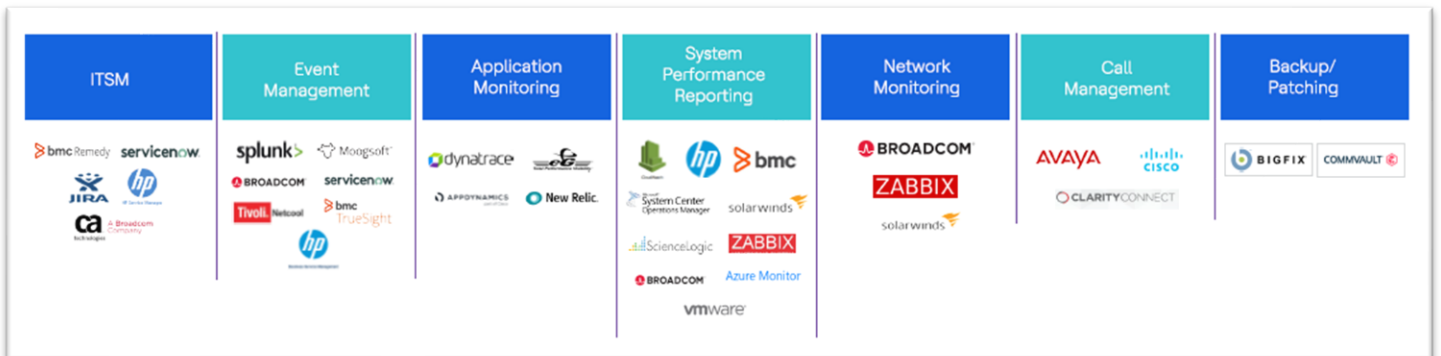

# Business Benefits

## Integration and Adapters

DRYiCE MyXalytics has adapters and works in tandem with leading third-party tools to ingest and process data streams and convert them into insightful and intuitive reports.

## Success Story

US based business services provider group with \$ 15 million per annum of cloud consumption with about 122 subscriptions, 1750 Servers.

### Business Challenges

- Lack of visibility of cloud spend in a single pane of glass.
- Increasing costs on public cloud No Budget allocation mechanism
- Underutilization of resources
- Less or no response from account owners on saving suggestions.
- No single point of contact for approvals
- Missing account owners' details
- Single account with multiple application owners

### Solution Highlights

- Lack of visibility of cloud spend in a single pane of glass.
- Increasing costs on public cloud No Budget allocation mechanism
- Underutilization of resources
- Less or no response from account owners on saving suggestions.
- No single point of contact for approvals
- Missing account owners' details
- Single account with multiple application owners

### Business and Technical Benefits

- Wastage Elimination - **\$274.68 K**
- Scheduling - **\$21.34 K**
- Right Sizing - **\$42.76 K**
- Reserved Instances - **\$100.73 K**
